

NORDEN MFG Brush Grapple

72" Brush Grapple

78" Brush Grapple

84" Brush Grapple

The Norden Mfg Brush/Root Grapple is built for maximum productivity, combining years of industry experience with precision engineering and rugged durability. Designed to grab, push, drag, and level material, this heavy-duty attachment tackles everything from brush and roots to logs and debris with ease. Whether you're clearing land, cleaning up storm damage, or maintaining property, the Norden Brush/Root Grapple delivers the strength and reliability to get the job done.

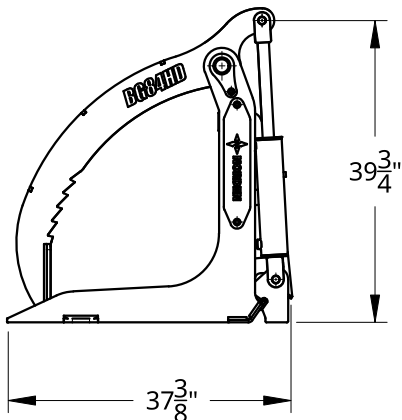

NORDEN MFG

Brush Grapple

Versatility

- **Precision Pinch Points** – Securely grip brush, logs, and demolition debris.
- **Versatile Performance** – Ideal for farm cleanup, land clearing, forestry, and construction.
- **Optional Bolt-On Pinch Plate** – Enhances gripping power for loose debris and demolition cleanup.

High Productivity

- **Large Brush Volume** – Elevated wrist pin design pulls in larger loads of brush and debris, helping you move more material with every cycle.
- **Pull Roots with Precision** – Exclusive claw-to-frame pinch points provide the control needed to securely grip and remove roots, saplings, and material from 1–4" in diameter.
- **Built for Dirt Work** – The bucket-style main frame lets you push, drag, and level dirt, making it easy to leave a smooth, clean job site after the debris is gone.

Brush Grapple Specs

Model	Description	Weight	Overall L x W x H
BG72HD	72" Heavy Duty Brush/Root Grapple	1143 lbs.	72.75"L x 37.5"W x 41.5"H
BG78HD	78" Heavy Duty Brush/Root Grapple	1267 lbs.	78.75"L x 37.625"W x 41.5"H
BG84HD	84" Heavy Duty Brush/Root Grapple	1328 lbs.	84.75"L x 37.375"W x 39.75"H

Heavy Duty Construction

- **Heavy-Duty Construction** – Built from Grade 50, 1/2" and 1" steel for exceptional strength and durability.
- **Built for High-Capacity Machines** – Designed for skid steers with 6,000–8,000 lb lift capacities.
- **Universal Quick-Attach** – Standard skid steer quick-attach plate provides fast hookup and broad machine compatibility.
- **Protected Hydraulic Routing** – Hydraulics are strategically positioned to minimize exposure to brush, logs, and debris.
